## Introduction

This report details the retention and graduation patterns of first-time, full-time undergraduate students entering Maryland's public four-year colleges and universities from 1988 to 2008. The analyses provided in the report include those students who remained at their original public four-year campus and those who graduated from any senior public college or university in the State.<sup>1</sup> Specifically, a student who originally matriculated at one of Maryland's thirteen public four-year institutions but transferred to, and subsequently graduated from, a different Maryland institution (public or independent) would still be counted in the graduation rate of the originating institution, regardless of the amount of time spent at either institution. The report provides up to six years of descriptive analyses for each cohort of students, and includes retention and graduation trends over the last 20 years. The data are also disaggregated by institution, gender and race.

For the first time since its inception, this year's report also includes campus-level data for Hispanic and Asian students whose enrollment comprised at least five percent of the undergraduate student population. Specifically, where the enrollment of first-time, full-time undergraduate Hispanic and Asian students met or exceeded five percent in a given year, marked the first reporting year for each group by campus. For example, Hispanic students at St. Mary's College of Maryland first met the five percent threshold in fall 2005 when 4.9 percent of all first-time, full-time undergraduate students were Hispanic. As such, the retention and graduation rates for Hispanic students from St. Mary's are included in this report from 2005 onward.

Another new report feature is the inclusion of retention data for the 2007 and 2008 cohorts of students from the University of Baltimore (UB). Graduation data for this campus will be available beginning with the 2012 report. Prior to 2007, UB did not enroll first-time undergraduate students.

Figures for the entering class of 1996 and beyond include the following changes which stem from the development of the Federal Graduation Rate Survey (GRS):

- Retention rates of all first-time undergraduates, and not just first-time *freshmen*, are included. This allows for the inclusion of students who are first-time college students but, through advanced placement or other early credit-granting means, accumulated enough college credits to enter above freshman standing.
- Students who are enrolled at multiple institutions are included more than once in the cohort. Prior to the 1996 cohort, these cross-enrolled students were reported at only one campus on a randomly selected basis.

---

<sup>1</sup> While included in the aggregate statewide tables, individual institution data for the University of Maryland, Baltimore and the University of Maryland University College have been excluded. The University of Maryland, Baltimore is excluded because it does not enroll first-time students. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

- If an institution reports a new social security number for a student, the student is tracked on the basis of the new number. In earlier cohorts, these students were treated as having dropped from the institution. The impact of this change is greatest at institutions with a large number of foreign students, who are often assigned “dummy” social security numbers when they initially enroll.
- The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an intersegmental workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland’s data resulting from GRS.

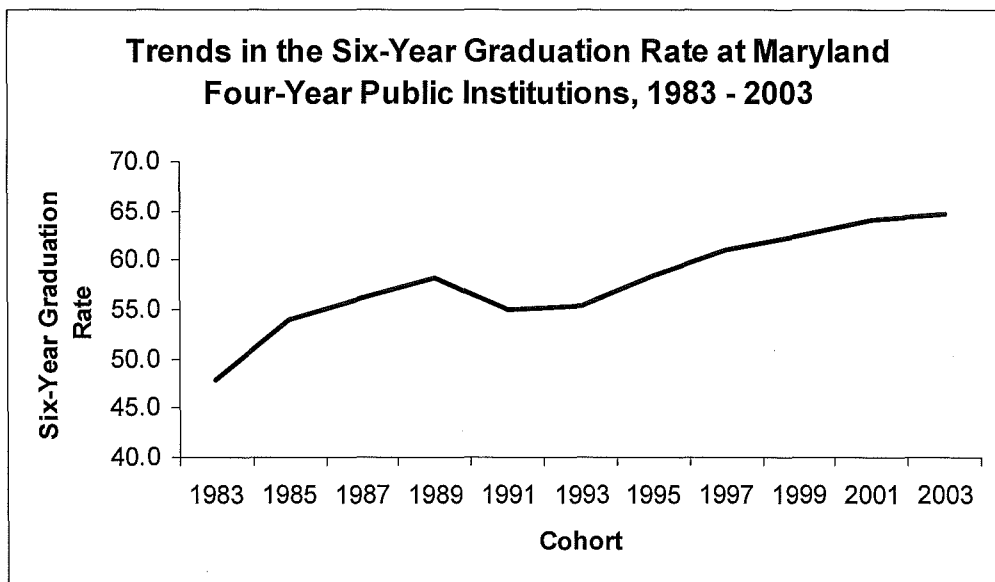

The second part of the report includes retention and graduation rates for Maryland residents who entered one of the state’s independent institutions. The analysis for the independent institutions includes only students who are Maryland residents. Most of the state’s independent institutions began providing the Commission with unit record information about the enrollment and degree completion patterns of Maryland residents in fall 2004.

## Maryland Four-Year Public Institutions

### Six-Year Graduation Rates

#### Overall

- **The 2003 cohort of first-time, full-time students set a new six-year graduation rate record of 64.7 percent.** This rate increased slightly from last year's rate of 64.3 percent. The six-year graduation rate has increased steadily for the last 10 years—gaining just over nine percentage points since 1993 when it was 55.4 percent.
- The public institutions with the highest six-year graduation rates for the 2003 cohort were St. Mary's College of Maryland (85.5 percent), University of Maryland, College Park (82.7 percent), Towson University (75.1 percent) and Salisbury University (72.3 percent).
- In comparison to the 2002 cohort, the 2003 cohort of students at the University of Maryland Eastern Shore experienced a sharp decline in its six-year graduation rate—decreasing by nearly seven percentage points from 45.6 percent to 38.7 percent. In contrast, the six-year graduation rate for students at St. Mary's College of Maryland and Towson University rose sharply by nearly five percentage points at both institutions.

Source: MHEC Enrollment and Degree Information Systems

- Compared to last year's data, six of Maryland's four-year public institutions experienced gains in their six-year graduation rates for the 2003 cohort: Towson University gained 4.7 percentage points (70.4 percent to 75.1 percent), St. Mary's College of Maryland gained 4.6 percentage points (80.9 percent to 85.5 percent),

Frostburg State University gained 3.2 percentage points from (57.2 percent to 60.4 percent), University of Maryland Baltimore County gained 1.6 percentage points (66.3 percent to 67.9 percent), Morgan State University gained less than 1 percentage point (34.1 percent to 34.8 percent), and University of Maryland College Park gained less than 1 percentage point (82.1 percent to 82.7 percent).

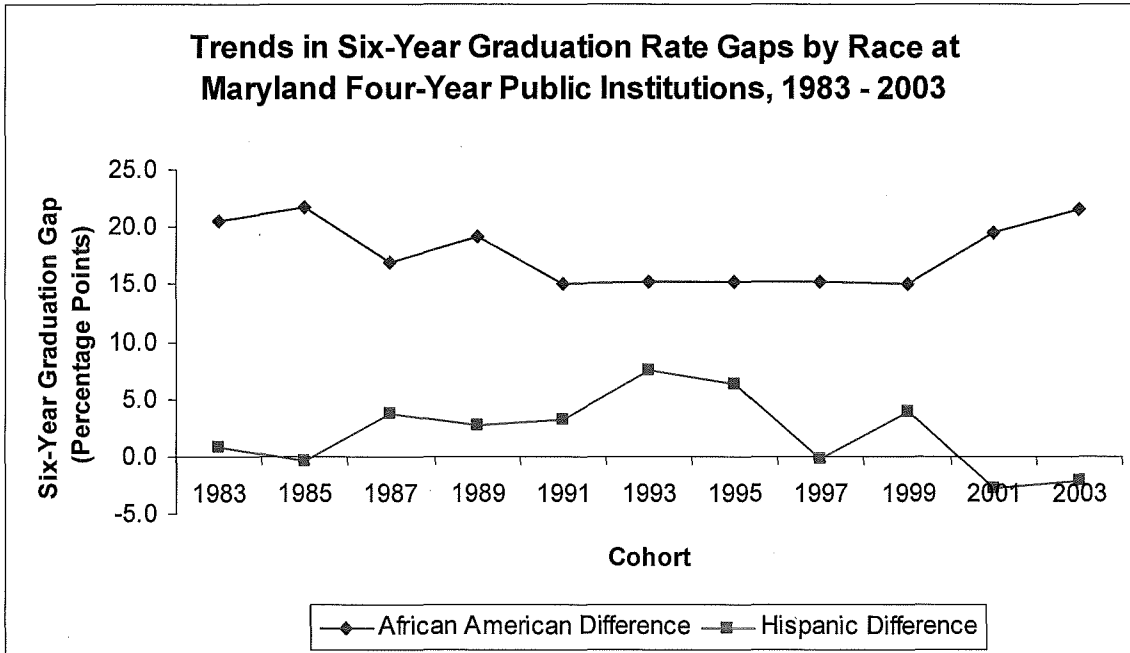

*Race*

- The six-year graduation rate of African Americans students has declined steadily since the 1999 cohort of students achieved a 10-year high of 47.5 percent. Since that time, the graduation rate has declined by 4.3 percentage points. This year, the graduation six-year graduation rate for the 2003 cohort of African American students was 43.2 percent.
- The 2003 entering cohorts of Asian students and White students set all time highs for their six-year graduation rates (77.0 percent and 76.4 percent, respectively).
- Despite last year’s record high for the 2002 cohort, the graduation rate for Hispanic students in the 2003 cohort decreased from 69.0 percent to 66.7 percent.

<b>Trends in Six-Year Graduation Rates at MD Four-Year Public Institutions by Race, 1983 - 2003</b>					
	<b>1983</b>	<b>1988</b>	<b>1993</b>	<b>1998</b>	<b>2003</b>
All Students	48.0%	57.8%	55.4%	62.1%	64.7%
African-Americans	27.5%	39.4%	40.2%	45.6%	43.2%
Asians	59.0%	66.9%	63.2%	70.8%	77.0%
Hispanics	47.1%	51.3%	47.8%	62.1%	66.7%
Whites	54.9%	64.7%	64.6%	70.0%	76.4%

Source: MHEC Enrollment and Degree Information Systems

- The four-year public institutions with the highest six-year graduation rates for African-American students in the 2003 cohort were St. Mary’s College of Maryland (81.3 percent), Towson University (75.9 percent), University of Maryland, College Park (70.8 percent) and University of Maryland Baltimore County (65.6 percent).
- The University of Maryland College Park (UMCP) was the only public four-year institution in this year’s report whose Asian, Hispanic, and African American cohort of students has campus-level data, which allowed for an examination of the difference in graduation rates among the groups. The difference between the six-year graduation rates of African American students and all students at UMCP was 11.9 points (70.8 percent versus 82.7 percent, respectfully). The 2003 cohort of Hispanic students achieved a graduate rate of 74.1 percent, 8.6 points lower than all students. The 2003 Asian cohort of students at UMCP has a six-year graduation rate that was 4.1 points (86.8 percent) higher than the rate of all students for that year.

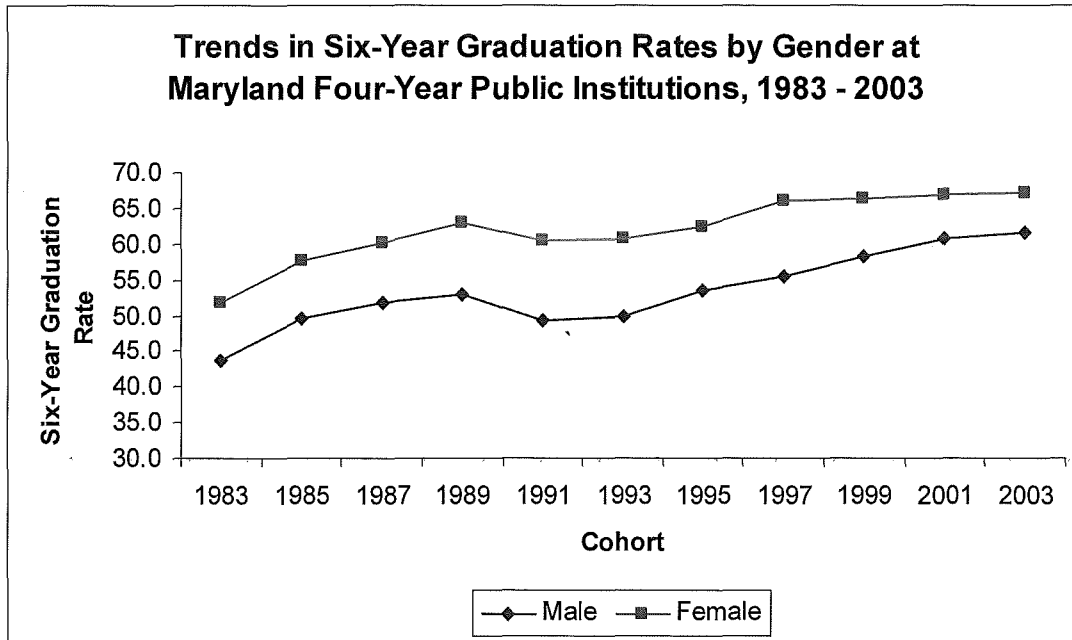

Source: MHEC Enrollment and Degree Information Systems

- Since the late 1990's, the graduation rate gap between African American students and the total population of students has steadily increased. As the graph above illustrates, during the 1990s, the gap between African American students and all students remained relatively stable at about 15 points. However, since 1999 the gap between these two groups has increased steadily, and currently stands at 21.5 points (64.7 percent for all students in the 2003 cohort and 43.2 percent for African American students in the 2003 cohort). In contrast, the graduation differences between Hispanic students and all students have disappeared in the last several years. However, these gaps are not comparable across the two groups because there are far fewer Hispanics enrolled in Maryland's four-year public institutions, skewing the graduation and retention outcomes for this group.

## Gender

- The six-year graduation rate for male students in the 2003 cohort increased slightly since last year, from 60.8 percent to 61.6 percent. The six-year graduation rate for female students remained the same at 67.1 percent.

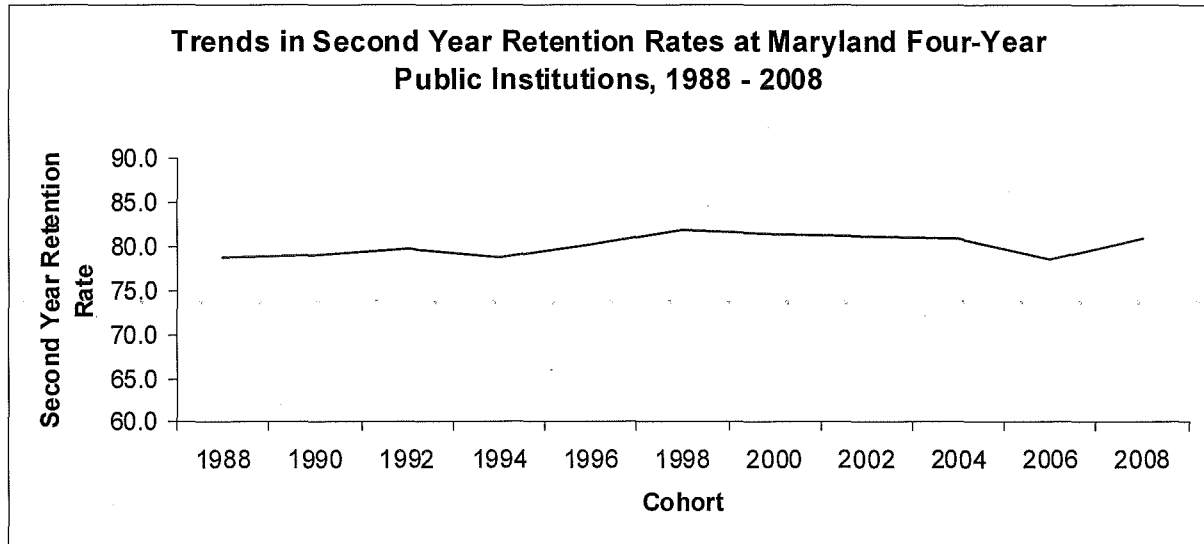

Source: MHEC Enrollment and Degree Information Systems

- From the inception of this study, the graduation rate for women has consistently been higher than the rate for men. However, over the last ten years, the gap between men and women has decreased by half; from 11.0 percentage points for the 1993 cohort to 5.5 percentage points for the 2003 cohort. The 2003 cohort of students experienced the smallest gap in graduation rates between men and women at 5.5 points (61.6 percent for male students and 67.1 percent for female students).
- For the 2003 cohort, the six-year graduation rate for African American men increased to 38.1 percent after three years of steady decreases (38.7 percent for the 2000 cohort, 37.5 percent for the 2001 cohort and 36.2 percent for the 2002 cohort). The rate for African-American women decreased from 47.1 percent to 46.4 percent.

## Second Year Retention Rates

### Overall

- The second-year retention rate for all first-time, full-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 80.8 percent for the 2008 cohort, which marks a marginal decrease from the 2007 cohort's rate of 81.0 percent.

Source: MHEC Enrollment and Degree Information Systems

- The institutions with the highest second-year retention rates were the University of Maryland, College Park (93.0 percent), St. Mary's College of Maryland (90.8 percent), University of Maryland Baltimore County (85.2 percent) and Towson University (83.0 percent). UMCP (93.7 percent to 93.0 percent) and UMBC (86.8 percent to 85.2 percent) both experienced slight decreases in their second-year retention rates for the 2008 cohort of students. Towson experienced an increase of 2.2 percentage points in its rate, while St. Mary's second-year retention rate increased by 1.6 percentage points.
- Five institutions, in addition to Towson and St. Mary's, experienced gains in their second-year retention rates for the 2008 cohort: Coppin State University gained 3.4 percentage points (58.4 percent to 61.8 percent), University of Maryland Eastern Shore gained 2.7 percentage points (65.9 percent to 68.6 percent), Bowie State University gained 1.3 percentage points (69.5 percent to 70.8 percent), Morgan State University gained less than 1 percentage point (67.7 percent to 68.3 percent) and University of Baltimore gained 13.8 percentage points (67.8 percent to 81.6 percent).

<b>Trends in 2nd Year Retention Rates at MD Public 4yr Institutions by Ethnic Group</b>					
	<b>1988</b>	<b>1993</b>	<b>1998</b>	<b>2003</b>	<b>2008</b>
All Students	78.7%	78.6%	81.9%	81.3%	80.8%
African- Americans	72.3%	75.2%	76.1%	74.1%	72.8%
Asians	87.2%	87.7%	86.5%	86.6%	89.5%
Hispanics	78.5%	75.6%	83.9%	84.4%	81.0%
Whites	80.6%	80.2%	84.5%	85.7%	85.2%

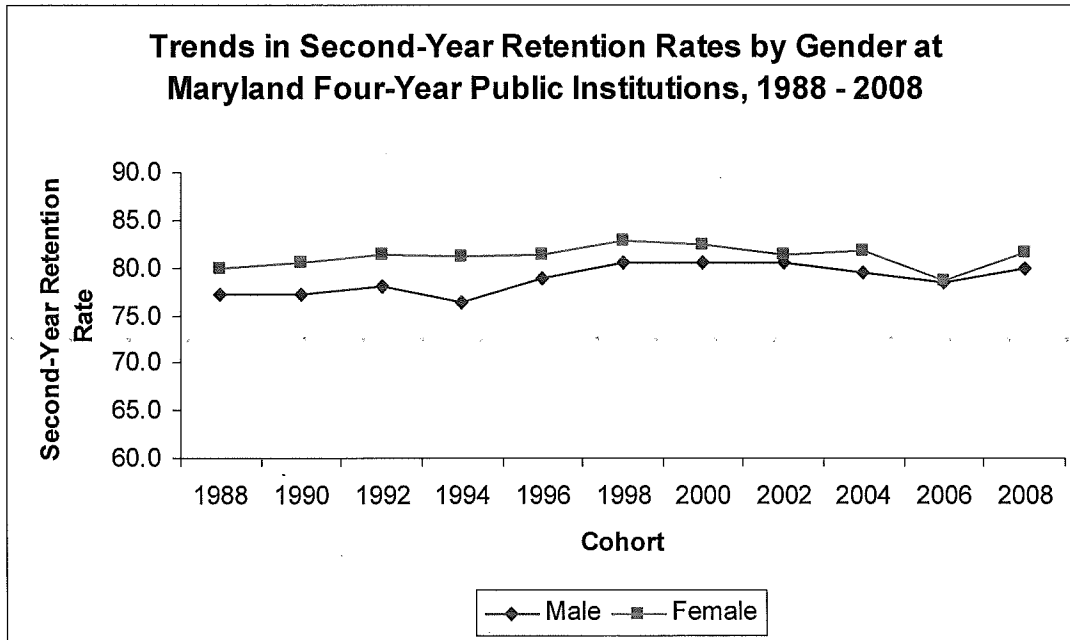

Source: MHEC Enrollment and Degree Information Systems

### *Race*

- Asian students had the highest second-year retention rate (89.5 percent) of all racial/ethnic groups. This marks both a record high and the fourth consecutive increase in the second-year retention rate for Asian students in Maryland.
- After two years of increases, the second-year retention rate for Hispanic students decreased by 2.4 points from 83.4 percent to 81.0 percent. Also, the second-year retention rate decreased slightly by less than one percentage point, for White students (from 85.5 percent to 85.2 percent).
- The second-year retention rate for the 2008 cohort of African-American students remained the same at 72.8 percent. This rate was highest for students who attended St. Mary's College of Maryland (97.1 percent), University of Maryland, College Park (90.7 percent), Towson University (87.6 percent), and the University of Maryland Baltimore County (87.1 percent).
- The second-year retention rate for African-American students at Maryland's historically Black institutions (HBIs) has increased over the last year: University of Maryland Eastern Shore by 3.9 percentage points (65.7 percent to 69.6 percent), Coppin State University's by 2.4 percentage points (58.6 percent to 61.0 percent), Bowie State University's rate grew by 1.3 percentage points (69.7 percent to 71.0 percent), and Morgan State University by 1.1 percentage points (67.4 percent to 68.5 percent).

## Gender

- Since the Commission began collecting retention data, rate for women has consistently exceeded the rate for men. Last year's 2007 cohort marked the first time that the men's second-year retention rate exceeded that of their female counterparts. For the 2007 cohort, the second-year retention rate for men was 81.2 percent while the rate for women was 80.8 percent. However, for the 2008 cohort, women once again had a higher retention rate (81.6 percent) than men (79.9 percent).

Source: MHEC Enrollment and Degree Information Systems

- Among African-American students, females continue to achieve higher second year retention rates than their male peers. The 2008 cohort of African American female students had a second-year retention rate of 73.9 percent, while the rate for African American male students was 71.1 percent.

## **Maryland State-Aided Independent Institutions (MD Residents only)**

This section of the report analyzes five-year graduation rate and second-year retention rate data for Maryland residents who began their academic pursuits at one of the state's independent institutions. The independent campuses began providing these data elements five years ago, so the six-year graduation rates will be included for the first time in next year's report.

### **Five-Year Graduation Rate**

- The five-year graduation rate for the 2004 cohort of new full-time students at an independent Maryland institution was 61.8 percent. This is slightly higher than the five-year graduation rate for the 2004 cohort of students at Maryland public four-year institutions (58.5 percent). The independent institutions with the highest five-year graduation rates for the entering class of 2004 were Johns Hopkins University (85.3 percent), Maryland Institute College of Art (77.6 percent), Loyola University (77.4 percent) and Goucher College (76.2 percent).
- The five-year graduation rate for the 2004 cohort of African-American students at an independent institution was 40 percent, an increase of 10 percentage points over the four-year graduation rate of 30.8 percent.
- For the 2004 cohort of students, the five-year graduation rate for African-Americans at independent institutions is 6.8 percentage points higher than the same rate for African-Americans at Maryland's four-year public institutions (40.3 percent at independent institutions and 33.5 percent at four-year public institutions).
- The five-year graduation rate for all students at independent institutions is over 20 percentage points higher than that of African American students at independent institutions (61.8 percent for all students versus 40.3 percent for African American students). This graduation rate gap between African Americans and others is larger at Maryland's four-year public institutions, where the gap in five-year graduation rates is 25 percentage points (58.5 percent for all students versus 33.5 percent for African American students).
- The 2004 cohort of women at the state's independent institutions had a slightly higher five-year graduation rate (62.7 percent) than men (60.0 percent).

### **Second Year Retention Rates**

- After a decrease of over four percentage points last year, the second-year retention rate of all students attending independent Maryland institutions increased 3.4 percentage points to 78.8 percent for the 2008 cohort. Second year retention rates of Maryland residents at Johns Hopkins University (96.4 percent), St. Johns (93.8 percent),

Maryland Institute College of Art (89.4 percent) and Loyola University-Maryland (88.0 percent) exceeded those at the other state-aided independent institutions.

- The 2007 cohort of African American students had a record low second-year retention rate of 61.8 percent. The rate for African-American students in the 2008 cohort increased nearly 10 percentage points to 71.6 percent. The second-year retention rates of African American Maryland students at Johns Hopkins University (95.7 percent), Loyola University-Maryland (91.3 percent), Hood College (90.9 percent) and Goucher College (86.4 percent) exceeded those for African American students at the other state-aided independent institutions in Maryland.
- For the third year in a row, the second-year retention rate for women (79.1 percent) exceeded that for men (78.5 percent).

## Conclusions

In the latest *Measuring Up* (2008) report by The National Center for Public Policy and Higher Education, Maryland was ranked #3 in terms of the percentage of students who earn a bachelor's degree within six years of initial enrollment. Maryland has remained a top-performer on this measure for the last decade, and during this time, the State's six-year graduation rate has steadily climbed. Over the last 10 years, the graduation rate has increased nearly 10 percentage points—from 55.4 percent in 1993 to 64.7 percent in 2003. The class size of entering cohorts has also increased by nearly 3,500 students, suggesting that Maryland's four-year public campuses are continuously meeting the needs of its increasing student population, and are committed to ensuring that more students completing their postsecondary degrees in a timely manner.

The statewide six-year graduation rate for the 1999 cohort of African-American students reached an all-time high of 47.5 percent. However, since that time, the success rate for this group of students has continued to decline. Hispanic students are making strides toward increasing their degree completion rates. Last year, the 2002 cohort of Hispanic students achieved a record high six-year graduation rate of 69.0 percent, and this figure declined slightly to 66.7 percent for the 2003 cohort. Maryland's four-year institutions have also created several campus-based programs to enhance advising, promote readiness at the high school level, help students adapt to the rigor of higher education prior to fall entry, and enhance counseling and tutoring opportunities. In 2007, the University System of Maryland launched its *Closing the Achievement Gap Initiative* campaign in an effort to close by half the gaps in enrollment and degree attainment by 2015.

Since 1983, the differences in the six-year graduation rate between African-American and White students has grown larger, from 20.5 percentage points in 1983 to 33.2 percentage points in 2003. According to the *Measuring Up* report, Maryland has one of the largest Black-White six-year graduation gaps in the nation. Hispanic students in Maryland graduate at rates closer to those of their White counterparts than do African American students. In 2003 the six-year graduation rate gap between White and Hispanic students was 9.7 percentage points.

States that successfully increase their retention rates are more likely to have higher graduate rates. Over the last 20 years, Maryland's second-year retention rates have fluctuated. In 2001, Maryland achieved its highest second-year retention rate ever, 82.6 percent. Since that time, the second-year retention rate has hovered around 80 percent. Nearly 81 percent of students in the 2008 cohort returned to school after their first year of study.

When compared to the nation, Maryland performs well—ranked 13<sup>th</sup> in the nation—in terms of the percentage of students who return after one year of study. The retention rates of Asian students, particularly from 2005 to 2008, continue to far exceed the rate of all students, as well as the rate for White students and other minority groups.
