Introduction

This report contains the retention and graduation patterns of full-time undergraduate students at Maryland's public four-year colleges and universities from 1983 to 2003. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.¹

Figures for the entering class of 1996 and beyond include changes resulting from the development of the Federal Graduation Rate Survey (GRS):

- Retention rates of all first-time undergraduates and not just first-time freshmen are included.
- Students who are enrolled at multiple institutions are included more than once in the cohort. Prior to the 1996 cohort these cross-enrolled students were reported at only one campus on a randomly selected basis.
- If an institution reports a new social security number for a student, the student is tracked on the basis of the new number. In earlier cohorts, these students were treated as having dropped from the institution. The impact of this change is greatest at institutions with a large number of foreign students, who are often assigned "dummy" social security numbers when they initially enroll.
- The method used to match student enrollment and degree attainment is based on the federal GRS procedures and on the recommendations of an intersegmental workgroup.

Information on cohorts from previous years remains unchanged. There are no significant policy changes in Maryland's data resulting from GRS.

This report includes for the first time, Maryland residents who enrolled at a public institution between 1998 and 2003 and who subsequently transferred to a Maryland state-aided independent college or university. These institutions began providing the Commission with unit record information about the enrollment and degree achievement of new full-time students who are Maryland residents beginning in fall 2004. The inclusion of these institutions may increase the graduation rates for students in the 1998 cohort. There is no effect on retention statistics, since the report examines these rates within the original institution only. The following state-aided independent institutions

¹ The University of Baltimore and the University of Maryland, Baltimore are excluded because they do not enroll first-time freshmen. The University of Maryland University College is excluded due to its mission to serve the adult, part-time population.

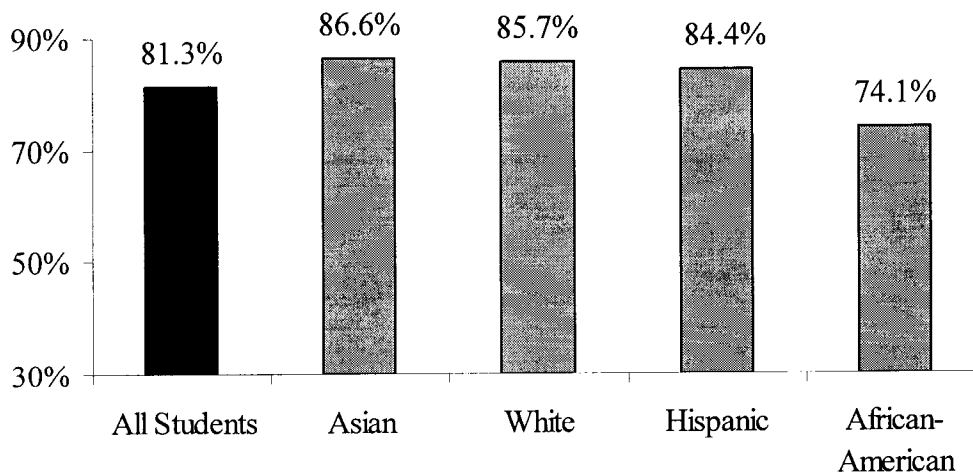

provided data: Baltimore Hebrew University, Baltimore International College, Capitol College, Columbia Union College, Goucher College, Hood College, Johns Hopkins University, Loyola College, MD Inst. College of Art, McDaniel College, Mt. St. Mary's College, College of Notre Dame, St. John's College, Sojourner-Douglass, Villa Julie College, Washington College.

Findings

Second Year Retention Rates: Statewide

- The second-year retention rate of all full-time, first-time undergraduates, as measured by the percentage of those returning to their original campus after one year, was 81.3 percent for the 2003 cohort. Asian students surpassed all others at 86.6 percent.

Figure 1
Second Year Retention Rates
2003 Cohort

- The second-year retention rate for African-American students was 74.1 percent, rising for the first time since the 1998 cohort. The retention rate of African-American students trailed that of other students.
- While female students have always exceeded their male counterparts in second year retention since the Commission began collecting these figures, the gap has steadily narrowed since the 1991 cohort. The second-year retention rate of first-time full-time

female students was 81.6 percent for the 2003 cohort compared to 81.0 percent for first-time full-time male students.

Figure 2
Second Year Retention Rates by Gender

Second-Year Retention: By Institution

- The second year retention rate of the 2003 cohort at University of Maryland College Park (92.1 percent) and St. Mary's College of Maryland (89.3 percent) exceeded all other public four-year institutions.
- The second year retention rates of African-American students in the 2003 cohort were the highest at Towson, St. Mary's, University of Maryland, Baltimore County and UMCP. The rates of African-American students surpassed the rates of students of **all** races at the following traditionally white institutions: Frostburg, Towson, St. Mary's, UMBC, and Salisbury.

Figure 3
Second Year Retention Rates of African-American Students
2003 Cohort

Six-Year Graduation Rate: Statewide

- The six-year graduation rate for the most recent cohort of all new full-time students is at **an all time high** at 62.1 percent. The six-year rates have risen for five consecutive cohorts (from 55.4 percent in 1993). The six-year graduation rates for African-Americans are significantly below the rates for Whites, Asians and Hispanics.

Figure 4
Six-Year Graduation Rates
By Ethnic Background

Ethnic Background	1983	1988	1993	1998
All Students	48.0%	57.8%	55.4%	62.1%
African-Americans	27.5%	39.4%	40.2%	45.6%
Asians	59.0%	66.9%	63.2%	70.8%
Hispanics	47.1%	51.3%	47.8%	62.1%
Whites	54.9%	64.7%	64.6%	70.0%

Source: Maryland Higher Education Commission Enrollment and Degree Information Systems.

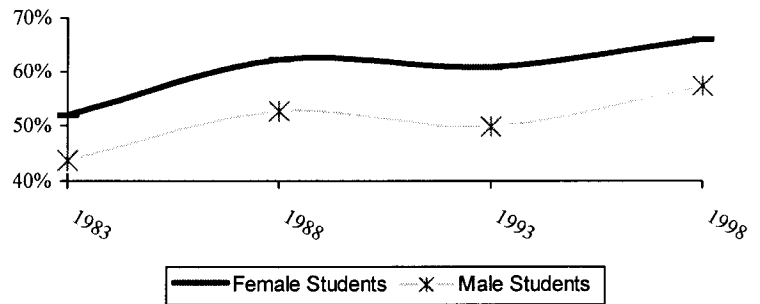

- Although the six-year graduation rate for full-time African-American students has consistently lagged behind that of all students and other ethnic groups, this gap has narrowed since 1983 when only 27.5 percent of African-American students graduated.

Figure 5
Six Year Graduation Rates
African-American Students and All Students

- Women are more likely to graduate in six years than men. The six-year graduation rate of female students for the entering class of 1998 reached 66.1 percent. In comparison, 57.3 percent of male students in the 1998 cohort graduated in this period. Both of these figures represent historical highs. The six-year graduation rates of women have always exceeded that of men.

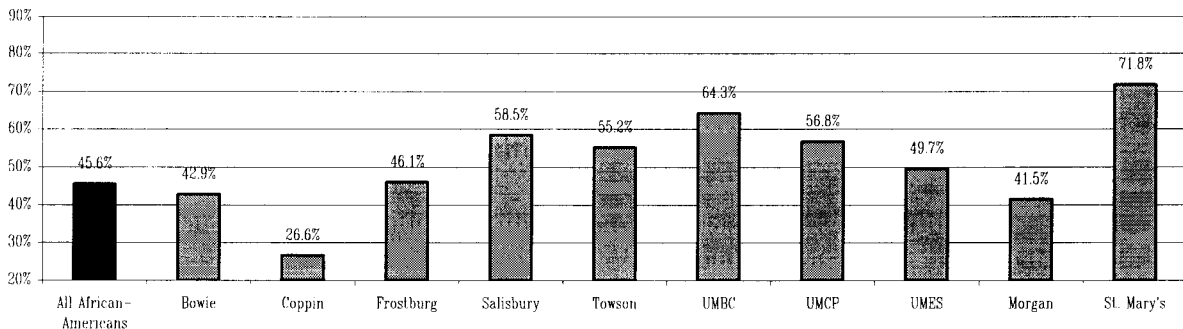

Figure 6
Six-Year Graduation Rates: By Gender

Six Year Graduation Rate: By Institution

- The four-year public institutions with the greatest six-year graduation rates for the entering class of 1998 were St. Mary's (79.9 percent), UMCP (72.9 percent), and Salisbury (72.8 percent). Three institutions (UMBC, UMCP, and Morgan) experienced the highest six-year rate in their history.
- The four-year public institutions that had the greatest six-year graduation rates among African-Americans in the 1998 cohort were St. Mary's (71.8 percent) and UMBC (64.3 percent). The rates at UMBC and Morgan were the highest in the institutions' history.

Figure 7
Six-Year Graduation Rates of African-American Students
1998 Cohort

Factors Impacting Student Attrition

Nearly 40 percent of all full-time undergraduates attending a Maryland four-year college or university had not completed a baccalaureate degree within six years in the most recent cohort.

Most Maryland public four-year institutions conduct some form of periodic research in the form of surveys or exit interviews to determine the reasons for student non-persistence. Based on information provided by the University System of Maryland and Morgan State University, these are the major factors for student attrition listed generally in order of importance:

- Program Issues
 - Lack of advising or advisor
 - Class scheduling problems
- Dissatisfaction with social life at the institution
- Personal
 - Family responsibilities
 - Health issues
 - Conflict between the demands of school and a job
- Financial
 - Lack of/inadequate funding for students to meet the cost of their education
- Academic Difficulty/Preparedness

The reason for non-persistence varied across campuses. In addition, there were major differences in the responses of native and transfer students in the one survey that separated the two groups. Transfer students overwhelmingly indicated “personal” reasons (including cost) while a plurality of first-time students indicated programmatic issues.
